

KNERAFLOW

FOR SMART SOLUTIONS

We build the **intelligent systems** businesses run on.

Private AI, document intelligence, hiring platforms and workflow automation — engineered for your business, in the cloud or entirely on your own hardware.

— AT A GLANCE

A small senior team that builds software **the right way.**

Whether you need a simple, elegant platform or a smart AI system that runs your business, we build the software your vision deserves — and we stay with you to make sure it keeps working. No agency overhead, no hand-offs to junior teams.

15 PRODUCTS IN OUR ECOSYSTEM

AI THAT RUNS ON YOUR OWN HARDWARE

SENIOR ENGINEERS ON EVERY PROJECT

WORKING SOFTWARE WEEKLY

SUPPORT THAT DOESN'T END AT LAUNCH

Four ways we put engineering to work.

Custom Web & Mobile Apps

Software designed around the way your team actually works — not how a generic tool wants them to work.

- Custom platforms built for your business
- Mobile apps for iOS and Android
- Designed to grow with you, not against you

AI That Works for Your Business

AI built into real workflows, solving real problems. Useful, not flashy.

- Smart search across your private documents
- AI assistants that run inside your company
- Automated decisions with explainable reasoning
- Voice and chat interfaces people will use

Reliable Hosting & Setup

Software that stays up, stays safe, and stays yours.

- Cloud, on-premise, or hybrid
- Monitored 24/7 with automatic backups
- Built to keep your data secure

Strategic Consulting

Cut through the noise. Get a clear path from idea to launch.

- Discover what actually needs building
- Honest audits of what you already have
- A roadmap for where AI actually pays off

— PRODUCT PORTFOLIO

15 products. One connected ecosystem.

PRODUCT	PURPOSE	GET STARTED
NMAIL	Communication	Request a demo
NDRIVE	Storage & collaboration	Request a demo
NMINUTES	Meeting intelligence	Request a demo
NMEET	Live meetings	Request a demo
NHIRE	Interview & selection	Beta · Request a demo
NSCOUT	Talent discovery	Request a demo
NLEARN	Learning management	Request a demo
NCORE	Business operations	Request a demo

Ask for a walkthrough to confirm capabilities, deployment, and pricing for your organization.

From a stack of résumés to a **scored interview** — without touching a spreadsheet.

01

Shortlist in NScout

Drop in a job description and the CVs. Every candidate is scored against the role with a written analysis.

02

Drag to Interview

An AI voice interview provisions itself. No configuration, no second tool.

03

The AI interviews

The candidate joins with a secure, time-limited link. Voice or chat, on their own time, recorded.

04

Review in your pipeline

The scored report and recording land back on the candidate card. Nothing is copied between systems.

NScout

AVAILABLE

- 50+ résumés ranked in under a minute
- Skills, experience fit, red flags, hidden strengths
- Side-by-side comparison of top contenders
- Reads PDFs, Word, scans, even handwritten CVs

NHire

BETA

- Voice or chat — candidates choose
- Questions tailored to the role, not one script
- Explainable summaries, no black-box scoring
- Every session recorded for your team to review

Why it matters

First-round interviews eat your team's time, and every interviewer runs them differently. The Hiring Suite gives every candidate a fair, structured first round — and gives your team back the hours.

SAME-DAY SETUP

Your documents never have to **leave the building.**

Most AI tools ship your most sensitive files to somebody else's cloud. Ours don't have to. We build and deploy AI that runs on hardware you own — the same capability, none of the exposure. That is the difference that wins us government, engineering and enterprise work.

NSource — private document intelligence

Turns your company's files into a knowledge base you can talk to. Ask in plain language, get a clear answer with the exact source and page it came from.

- Reads PDFs, Word, spreadsheets, scans, diagrams and engineering drawings
- Every answer points to the exact source and page — verifiable, not a guess
- Searches your whole document library at once
- Built to run on your own machines, not a shared cloud
- Ready in about a week

NMinutes — meeting notes that take themselves

Records the meeting, writes the summary, and pulls out the decisions and action items — so nobody has to take notes.

- Automatic transcription and readable summaries
- Action items and key decisions surfaced automatically
- Searchable history of every meeting your team has had
- Joins Google Meet and Microsoft Teams, or records locally
- A fully private on-premise mode is on the roadmap

The systems that keep an organization running.

NControl

Electronic document management for controlled, compliant operations.

- Hundreds of thousands of documents, organized and searchable
- Built-in approvals, versioning and audit trails
- Fine-grained control over who sees what
- Connects to the systems your team already uses

LIVE IN 4–10 WEEKS

NCore

Run your whole business from one connected system.

- Sales, inventory, finance, HR and operations in one place
- Tailored to your real processes, not a template
- Dashboards and reports your team will actually use
- Replaces five or more disconnected tools

LIVE IN 6–12 WEEKS

NFlow

Bookings, queues and waitlists without the front-desk chaos.

- Customers book and check in from their phone — no app
- Staff see the full queue live, in real time
- Automatic SMS and email reminders cut no-shows
- Runs in the cloud or fully offline on your hardware

LIVE IN 2–6 WEEKS

— CAPABILITY MAP

What we can build for you.

Smart Business Platforms

Web apps · Internal tools · Customer portals · Admin dashboards

AI-Powered Tools

Document search · Private AI assistants · Voice & chat agents · Smart automation

Workflow Automation

Connect your tools · Automated handoffs · End-to-end pipelines

Trusted Infrastructure

Secure hosting · On-premise systems · Backups & monitoring · Cloud architecture

Mobile & Customer-Facing

iOS & Android apps · Booking & checkout flows · Self-service portals

Data & Reporting

Custom dashboards · Real-time analytics · Reporting tools · Data warehouses

Connected Systems

API & ERP integration · WhatsApp & Slack bridges · Webhooks · Legacy modernization

Messaging & Notifications

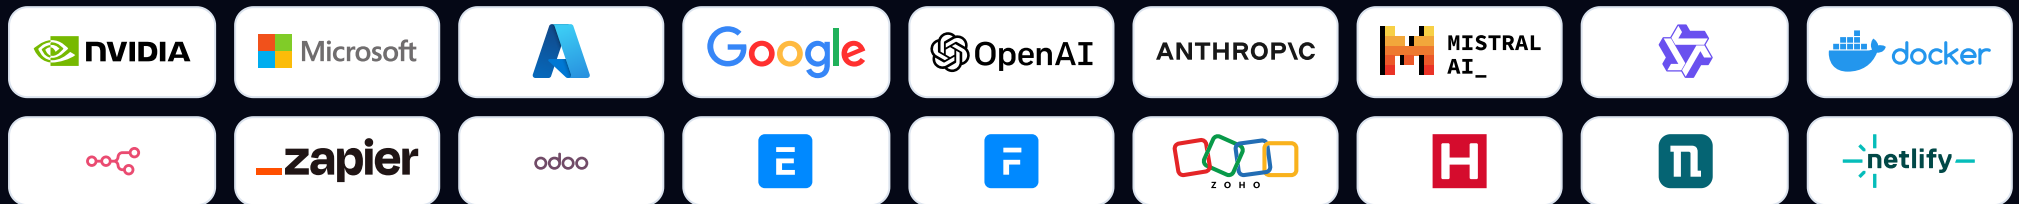

Chat bots & live chat · Voice agents · Email & SMS pipelines · Alert flows

WHAT THAT LOOKS LIKE IN PRACTICE

Hire only the best candidates · Sales that follows up while you sleep · One brain for every customer channel · Invoices and contracts that file themselves

— TECHNOLOGY

We build with the platforms you already trust.

— WHERE IT RUNS — YOUR CALL, NOT OURS

On your own hardware

Local GPUs, air-gapped networks, nothing leaving your building.

In your cloud

Azure, AWS, Hetzner or netcup — your tenancy, your keys.

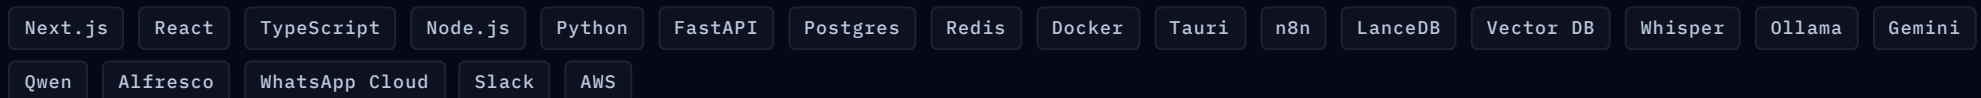

Hosted by us

Monitored around the clock, with automatic backups.

Hybrid

Sensitive workloads local, everything else elastic.

— ENGINEERING STACK

— WHO WE SERVE

Industries where our work already runs.

Recruitment & HR

Hiring tools, AI screening, and smooth onboarding.

Engineering Companies

Private AI assistants, document intelligence, engineering data systems.

Government & Enterprise

Private AI, document control, compliance-ready systems.

Real Estate & Services

Bookings, queues, and smoother customer experiences.

Finance & Operations

Invoice automation, ERP integration, and reporting.

Customer Support

Smart support, AI agents, unified customer channels.

Logistics & Scheduling

Dispatch, scheduling, and internal coordination tools.

Construction & Safety

Document control, site reporting, and compliance workflows.

— TRUSTED BY

ALWADI CONSTRUCTION

INNOVA BUILD

SAFETY & PROTECTION ASSOCIATION

— DELIVERY PROCESS

Four steps, and you see progress in every one.

STEP 01

We listen first

We map how your team actually works today — the people, the steps, the pain points — before we propose a thing.

STEP 02

We design the right solution

You see exactly what we're going to build, how it fits together, and how it'll handle your real-world cases.

STEP 03

We build it properly

Production-quality code, secure deployment, and clear progress every week — so there are no surprises at the end.

STEP 04

We make sure it works

Once it's live, we tune it around how your team really uses it — and stay on to keep it sharp.

Typical timelines

Focused projects: 4–8 weeks. Larger platforms: 3–6 months. You get the timeline before we start.

Transparent pricing

Discovery is a fixed fee. Builds are scoped against clear milestones. Support is monthly. No hidden costs.

Works with your team

We can contribute to your existing codebase and follow your process — or modernize old systems piece by piece.

Pick the shape that fits the problem.

1 - 3 WEEKS

Discovery Sprint

A short, focused process to figure out exactly what to build — before any code is written.

- A clear plan you can act on
- Diagrams of how it fits together
- Timeline and budget you can trust

4 - 16 WEEKS

Project Build

End-to-end delivery. Fixed scope, fixed timeline, clear milestones.

- Live, working software
- Documentation handed to your team
- 30 days of free polish after launch

MONTHLY

Embedded Team

A dedicated KNERAFLOW team that works alongside yours, week to week.

- Weekly delivery you can see
- Roadmap aligned to your priorities
- Support coverage when you need it

CONTINUOUS

Ongoing Care

We keep what we built running smoothly — monitored, secure, and growing with you.

- Monitoring around the clock
- Quarterly reviews and improvements
- Security updates and growth planning

— WHY TEAMS CHOOSE US

We're judged by what keeps working — not by what looks good in a deck.

Engineers, not slide-makers

Every project is led by someone who can design, build and operate the system — not someone who hands it to a junior team.

Security baked in

Protecting your data is part of the design from day one — not bolted on at the end before launch.

AI that actually works

We pick the right approach for production — running locally, in your cloud, or wherever it fits — with results you can trust.

You see progress every week

Working software in your hands week by week, transparent decisions, and no surprises three months in.

We don't disappear at launch

If you want us to, we'll stay on — keeping things running, monitoring health, and helping you take the next step.

Built to last, not just to ship

Clean, maintainable code. You can hand it to your team or another vendor later without a rewrite.

— READY WHEN YOU ARE

Tell us what you're trying to solve.

A focused 30-minute call. You tell us the problem; we come back with exactly what we'd build, how long it takes, and what it costs. No commitment, no pressure.
